

## What People Are Saying About Igneous

"Igneous' automated cloud tiering to any region and at multiple storage tiers within all major public clouds gives us choice and agility no other solution offers today."

**Michael Cockrill**  
CTO  
Altius Institute for Biomedical Sciences

**ALTIVS**  
INSTITUTE

"Our aim is to answer some of the biggest questions in bioscience and help accelerate research around the world. Partners like Igneous allow our scientists to focus on innovation and understanding what makes us human."

**Kris Winkler**  
Director - IT Operations  
Allen Institute

"At PAIGE.ai we are using artificial intelligence to revolutionize the clinical diagnosis and treatment of cancer. Igneous is able to provide intelligent data management that enables us to analyze an immense volume of unstructured pathology data. We rely on Igneous' expertise in unstructured data management to help us succeed with our mission."

**Dr. Brandon Rothrock**  
Sr AI Scientist  
PAIGE.ai

"I think it's going to be very valuable for high-performance-computing-driven workflows where people need to build a very powerful service or system that allows them to crunch a lot of data. The twist Igneous is adding is they're doing it as a service."

**Christophe Bertrand**  
Senior Analyst  
Enterprise Strategy Group

"Their zero-touch admin is real. It's the least admin overhead of anything I own."

**Systems Architect**  
Public Research University

"The company delivers the only Unstructured Data Management (UDM) as-a-Service offering, giving data-centric enterprises visibility, protection, and data mobility at scale."

**Chris Mellor**  
Editor  
Blocks & Files

"Igneous is on the cutting edge of a huge architectural shift in enterprise computing"

**John Furrer**  
Co-founder / CEO  
SiliconANGLE

"New public cloud enhancements give Igneous customers granular control of their data, letting them move individual data sets to any storage tier in public clouds."

**Johnny Yu**  
News Writer  
TechTarget

"Igneous will particularly appeal to I&O leaders who seek to lower storage TCO for unstructured data."

**Storage Analysts**  
Gartner Group

"Igneous is focused on providing "as-a-service" solutions for unstructured data, including storage, backup & archival, global metadata indexing, and data workflow management."

**Ethan Banks**  
Writer  
Packet Pushers

"DataProtect, DataDiscover and DataFlow support all file and object protocols in their native formats, across any on-premises or cloud location. Data-centric businesses, regardless of size, tend to be ideal customer for Igneous services."

**Lynn Haber**  
Content Director  
Channel Futures

"We believe Igneous embodies the drive, skill and passion on which tech thrives."

**Alex Vieux**  
Chairman  
Red Herring

"Igneous Systems provides multiprotocol support for Dell EMC Isilon OneFS, direct integration with Qumulo File Fabric (QF2) and Pure Storage FlashBlade object storage support. Igneous backs up data to its fully managed appliance that runs in the customer's data center. Customers can also tier data up to the Amazon, Microsoft and Google public clouds."

**Paul Crocetti**  
Senior Site Editor  
TechTarget

"Igneous provides continuous data visibility; search and classification; backup, archive and disaster recovery of all files and objects; and automated dataset movement based on data lifecycle requirements."

**Antony Adshead**  
Storage Editor  
Computer Weekly

"Igneous offers visibility into data assets and ensures they are migrated in a systematic way that reduces manual processes and enables scalable growth."

**Kylie Anderson**  
Storage Writer  
SiliconAngle

"Igneous supports backup and long-term archiving of unstructured file data to Azure Archive Blob Storage."

**Kumail Hussain**  
Sr. Program Manager  
Microsoft

"We are excited to see how their archive capability with API automation and fast data movers can really help us dramatically optimize our current workflow which will speed up our ability to deliver cost savings to the business by freeing up primary storage quicker."

**Senior IT Manager**  
Semiconductor and  
Telecommunications  
Equipment Company

"Igneous provides a solution that can store massive amounts of data. The solution also has the capability to interface directly with NAS systems (and currently supports NetApp, Dell EMC Isilon and Pure's FlashBlade)."

**George Crump**  
President  
Storage Switzerland, LLC
