

The right data, in the right place, at the right time.

Igneous delivers the only Unstructured Data Management as-a-Service solution, giving data-centric organizations visibility, protection, and data mobility at scale, wherever datasets and workflows live.

UDM as-a-Service, Anywhere for Everyone

UDM At Scale

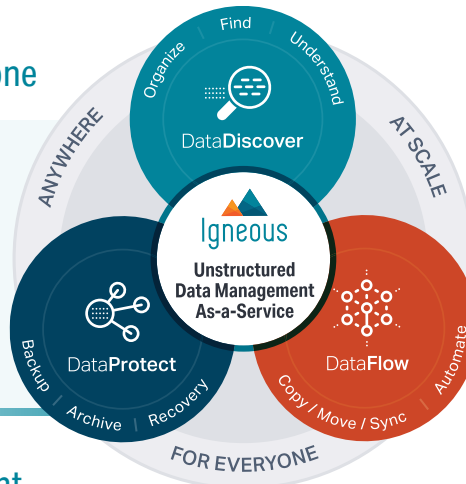

Billions of files/objects, exabytes of data

Anywhere Data Lives

Any NAS/object interface, onsite/offsite and any cloud

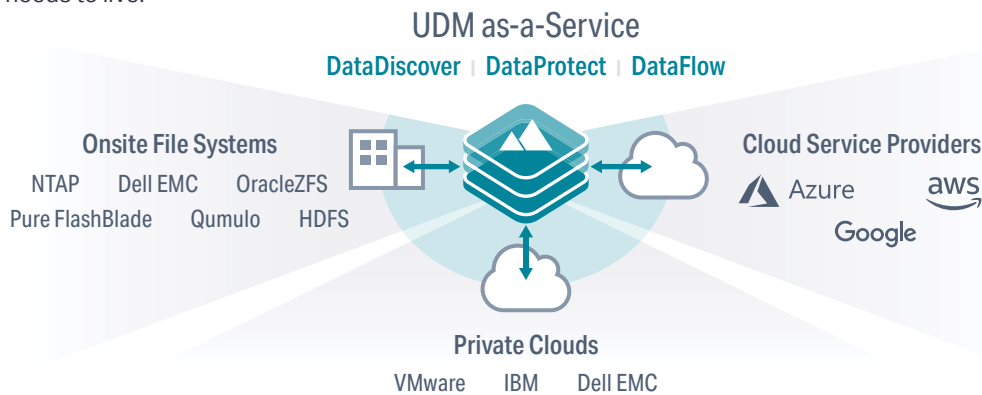

For Everyone

Supports IT & data owner use cases

Flexible Deployment for Any Environment

Deployed anywhere datasets reside, Ignеous classifies, protects and moves data wherever it needs to live.

Unstructured Data Driving Value

90% of global data growth is driven from unstructured data – machine generated, high fidelity file and object data. Together with cloud abstraction and composable IT, data-centric workflows harnessing the value of this data are now a reality for mainstream enterprises.

Unstructured Data Velocity	Cloud Abstraction, Composable IT	Data-Centric Workflows
<p>53ZBs</p> <p>Data creation predicted to hit 53 zettabytes by 2020</p> <p>- Hal Varian, Chief Economist at Google.</p> <ul style="list-style-type: none"> From Humans to Devices From Low to High Fidelity From Millions to Trillions of Files 	<p>+</p> <p>TensorFlow RESEARCH CLOUD</p>	<p>=</p> <ul style="list-style-type: none"> Simulations Video Sensors Bio-Informatics Satellite M2M Logs AI/ML Output

Organizations are investing in new strategies for managing, mobilizing and protecting unstructured data – and doing so in scalable, economically responsible and predictable ways.

Data-Centric Enterprises Trust Ignеous

Serving Global 1000 businesses including:

- 2 of the top 5 global semiconductor manufacturers
- Leading life sciences and pharma enterprises
- Largest global animation studio and multiple creators of media and virtual entertainment
- 2 of the largest game and mobile device manufacturers

Why Ignеous

- Time to value in days vs weeks
- Scan up to 1.6 billion files per hour*
- API-enabled for integration and automation
- Resource efficient via fully-managed service

Igneous at a Glance

Headquarters: Seattle, WA

Patents: 14

Technology Partners

AWS, MSFT Azure, Google Cloud Platform, Pure Storage, Qumulo

The Team

100+ combined years of SaaS, Cloud, File/Object Management

Investors

Madrona Venture Group, NEA, Redpoint, Vulcan Capital

*Igneous performance benchmarks are based on documented testing. Performance results will vary based on data profile, file system, protocol and jobs run.
